Quarterly Communication

January 1 - September 30, 2023

technotrans maintains revenue growth and realises EBIT rise in Q3

Development of key figures in the first 9 months 2023

		Q1	Q2	Q3	9M	Change from previous year
Revenue	m€	68.3	64.1	66.8	199.3	(+ 12.7 %)
EBIT	m€	3.5	2.4	4.2	10.1	(-3.5 %)
EBIT margin	%	5.2	3.7	6.2	5.1	(-0.8 pp)
ROCE*	%	13.0	12.4	12.3	12.3	(-0.1 pp)

* EBIT rolling

In a challenging economic environment technotrans maintained its revenue growth and achieved a rise in EBIT. In the third quarter of the 2023 financial year, the Group realised a consolidated revenue of € 66.8 million with an EBIT margin of 6.2 %. It achieved a solid performance for the quarter, in line with the more dynamic earning capacity expected in the second half of 2023 based on the easing of temporary pressures on earnings and the adjustments made to selling prices mid-way through the year.

The focus markets Plastics, Energy Management, Print and the Laser & Machine Tools market again delivered clear year-on-year revenue growth in the period under review. With an increase in revenue by 87 %, Energy Management achieved the most dynamic performance. Only the Healthcare & Analytics focus market did not reach previous year's revenue level. This development was due to the consolidation of stock levels of technotrans systems by customers, as presented in the Interim Report. However, this pattern of demand has broadly returned to normal since August 2023.

The availability of input materials has fundamentally continued to improve. The only exception is individual electronic components and control equipment. Despite falling commodity prices, the prices of materials remain high because of the delay in a positive price effect filtering through to component level. The order backlog was reduced to around € 83 million by clearing back orders caused by the supply chain. In addition, the level of orders in individual markets showed initial signs of a slower economic development. The book-to-bill ratio remained unchanged at 0.9.

The Technology segment delivered 14.3 % revenue growth to € 152.6 million, with an EBIT margin of 2.7 % (previous year: 3.4 %). In the Services segment, revenue rose by 7.9 % to € 46.7 million, with an EBIT margin of 12.6 % (previous year: 13.6 %).

The free cash flow of € 3.0 million was up € 8.3 million on the previous year's level of € -5.3 million. The main factor behind this change was the higher cash flow from operating activities. The equity ratio of 53.0 % indicates steadily solid economic circumstances.

The Board of Management is satisfied with the course of business in the third quarter, even though the earnings performance in the first 9 months was below expectations due to the prevailing conditions.

The forecast revised on August 2, 2023 is confirmed and now envisages consolidated revenue at the **upper end of the € 255 to € 265 million** range for the 2023 financial year, yielding an EBIT margin of 5.0 % to 6.0 %. The mid-range forecast remains valid.

Presentation of significant events and business performance in the first 9 months 2023

Development of the markets

Plastics focus market: the positive business performance continued. The mainstays included OEM business. New orders were secured especially for variothermal temperature control systems, freezer equipment and systems that run on the natural refrigerant propane (R290). technotrans uses this refrigerant in a wide range of innovative cooling systems that it showcased to a wide audience at the Fakuma 2023 industry exhibition. To some extent orders for large-scale refrigeration plants were postponed due to sharply higher interest rates that prompted investment hold-back among individual customers. Revenue for the nine-month period is roughly 8 % up on the equivalent period of the previous year.

Energy Management focus market: the 87 % revenue gain compared with the previous year is evidence that this area is enjoying a continued high growth momentum. The main factors behind its robust health are the consistently high number of battery thermal management systems (BTMS) delivered for rail vehicles and escalating demand for solutions for battery-buffered ultra-rapid charging stations. We have also made significant progress in expanding our market position for liquid cooling for data centres.

Healthcare & Analytics focus market: following on from the consolidation of stock levels at one major Healthcare & Analytics customer as described in the Interim Financial Report, demand has almost returned to normal since August 2023. Unit sales of other systems in this market have progressed according to plan. Development work in the complementary area of activity of thermal management solutions based on the natural refrigerant propane (R290) was intensified. This is a clear declaration by technotrans that it aims to reduce the global warming potential (GWP) of its products, using a solution that is also transferable to other markets. The revenue volume was around 21 % down on the **previous year due to this market segment's development as described.**

Print focus market: the Print focus market continued to develop more strongly than forecast in the Future Ready 2025 strategy. Packaging printing of cartons and films was the main driver of the positive business performance in the period under review. This more than compensated for the weaker performance of newspaper printing, leading to an overall 12 % rise in revenue.

Laser & Machine Tools: the Laser & Machine Tools area again achieved comparable growth to the preceding quarter in Q3. However, there were initial signs of a cyclical drop in investment activity. Overall, earnings for the nine-month period showed 13 % growth on the prior-year period. The clean room has moreover enabled technotrans to consolidate its position as a partner for laser-based processes in the semiconductor industry and to increase its capacity utilisation yet further.

Strategy

Since the publication of the Future Ready 2025 strategy in 2020, external factors have brought about a huge shift in the general situation. This prompted the Board of Management to commission an external consultancy in May 2023 to review the original strategic assumptions. The assignment was carried out in Q2 and Q3 2023.

The main outcome was that the general strategic direction as implemented by the Board of Management and the objective of the technotrans Group were in essence confirmed. The core technology of thermal management is underpinned by global megatrends such as electrification, digitalisation and decarbonisation, thus offering consistently high organic growth and profit potential. The focus on the Plastics, Healthcare & Analytics, Energy Management and Print markets enables technotrans to serve virtually every market segment that it considers attractive. One visible sign of the technotrans Group's successful strategic setup is the increased resilience that enables the company to achieve significant growth even in economically unsettled times.

In light of the dynamic growth that Phase II of the Future Ready 2025 strategy is designed to deliver, the review provided a sharper emphasis and focus on individual aspects of the strategy. These aspects include the future elevation of the market for highly specific laser applications to the status as a focus market. The crucial factors behind this assessment are the significant growth achieved in the 2021 and 2022 financial years along with the positive market opportunities for the laser market.

As regards future product development and the general sales emphasis, there has been a shift in all of the now five focus markets towards modular products with scalable volumes. In parallel, expanding the range of services guarantees an appropriate share of recurring revenue. One further area of action involves focusing geographically on the Europe and North America regions and giving sales, purchasing and service operations. Suitable M&A opportunities are considered as a means of accelerating strategic growth. However, the overriding goal remains a steady, organic rise in revenue and earnings.

The potential ways identified for achieving this goal will be elaborated over the coming weeks and incorporated into the strategic roadmap. Each of them will be assigned specific measures. These will be steadily implemented by Group-wide project management in order to realise the short and medium-term revenue and earnings potential in each case.

Sustainability

technotrans received the “Digital.Pilot23 im Kreis Warendorf” award for its “digital only concept”. As presented in the 2022 Annual Report, technotrans has virtually eliminated printed documentation thanks to the easybrowse content delivery portal operated by the Group subsidiary gds. This form of digitalisation helps technotrans save 1.3 million sheets of paper printed on both sides every year, at the Sassenberg location alone. **This sustainable concept was the basis for technotrans' triumph in the “Digital Business Processes” prize category.**

The drive to electrify the vehicle fleet continued. Since August, there have been two fully electric pool vehicles at Sassenberg. Such vehicles are also already available at the Meinerzhagen and Holzwickede locations. Work is just beginning at Sassenberg on the installation of an extensive charging infrastructure.

Change on Supervisory Board

Sebastian Repegather resigned from the Supervisory Board with due notice for personal reasons with effect from August 31, 2023, pursuant to Section 12 (4) of the Articles of Association of the company.

By resolution dated September 29, 2023, the Local Court of Münster appointed Florian Herger as his successor until the next Annual General Meeting. His appointment was made on the application of the Board of Management and the Supervisory Board Chair. Florian Herger is currently responsible for listed investments at Luxempart S.A..

Economic environment / procurement markets

The economic environment continues to deteriorate. In its World Economic Outlook dated October 2023, the International Monetary Fund (IMF) anticipates that the global economy will grow by 3.0 % in 2023. For Germany, the IMF forecasts a contraction of 0.5 % for 2023. The German government likewise expects economic output to decline by 0.4 % this year. Key factors are the effects of higher interest rates on demand and the weakening effect this has had on industrial output. The trend is also evidenced by a declining order backlog in manufacturing industry. For August 2023, the Federal Statistical Office reported a 0.7 % dip on the previous month. In the mechanical engineering sector, this trend is even more marked at minus 1.0 %. The order reach fell to 7.1 months, its lowest level since June 2021. With the exception of electronic components and control equipment, the availability of input materials has improved further. Meanwhile the prices of materials remain high.

Overall statement by the Board of Management on the business performance

“technotrans achieved a good performance in Q3 2023, confirming the expected higher earnings momentum in the second half of the year. This was substantially based on its consistent implementation of Phase II of the Future Ready 2025 strategy, extensive sales activities and the **Board of Management’s successful steps to improve earnings**.

The Board of Management is satisfied with the course of business in the third quarter. However, earnings performance in the first 9 months was below expectations due to the difficult conditions in the first half of the year."

Revenue and financial performance (in m€)

	01/01– 30/09/2023	01/01– 30/09/2022	Change from previous year
Revenue	199.3	176.8	12.7 %

Net profit for the period*	5.6	6.9	-18.6 %
Earnings per share (€)	0.81	1.00	-19.0 %

* Profit attributable to shareholders of technotrans SE

Revenue performance

The technotrans Group achieved consolidated revenue of € 199.3 million in the first nine months of the 2023 financial year (previous year: € 176.8 million). The focus markets Plastics, Energy Management, Healthcare & Analytics and Print accounted for a 73 % share of this figure. The absolute year-on-year growth was € 22.5 million. Again, the focus markets contributed the greater part of this total: € 17.0 million. The strongest relative growth was achieved in the Energy Management focus market, which gained 87 %.

The Technology segment realised revenue of € 152.6 million in the period under review (previous year: € 133.5 million). Revenue for the Services segment rose to € 46.7 million (previous year: € 43.3 million).

Earnings situation

The significantly more difficult economic environment impacted the business performance in the first nine months and demanded considerable flexibility from market operators. In this challenging environment, technotrans performed well in the third quarter. The EBIT margin was increased from 4.5 % as published in the Interim Report to 5.1 %. This also demonstrated that the temporary burdens on earnings reported in the first half have eased considerably, as expected.

Gross profit climbed to € 52.7 million (previous year: € 49.2 million). The change in the gross margin to 26.4 % (previous year: 27.8 %) was driven by the time lag, as previously mentioned in the 2023 Interim Financial Report, between price increases for materials and selling price rises, start-up and training costs from setting up the new production location in Steinhagen, the increased use of temporary personnel for clearing back orders as well as consultancy costs for the strategy review. The gross margin showed a slight improvement on the position on June 30, 2023. EBITDA was almost unchanged from the previous year at € 15.3 million. The EBITDA margin came to 7.7 % (previous year: 8.7 %). Temporary burdens particularly in the first half and the very volatile market environment led to a consolidated operating result (EBIT) of € 10.1 million (previous year: € 10.4 million). This translated into an EBIT margin of 5.1 % (previous year: 5.9 %). The return on capital employed (ROCE) reached 12.3 %

(previous year: 12.4 %). The consolidated result after tax for the period under review came to € 5.6 million (previous year: € 6.9 million). This corresponds to earnings per share of € 0.81 (previous year: € 1.00).

The results for the segments developed as follows: the Technology segment achieved an EBIT margin of 2.7 % (previous year: 3.4 %), reflecting the temporary burdens outlined above. Long-term price agreements with customers coupled with higher prices for materials and the increased use of contractors led to an EBIT margin of 12.6 % for the Services segment (previous year: 13.6 %). Compared with the first-half year margins of 2.0 % for the Technology segment and 12.4 % for the Services segment, this reveals a positive trend now that the temporary burdens on margins as outlined above are coming to an end and the effect of price adjustments is filtering through.

Key figures of the segments

		Technology		Services		technotrans Group	
		9M 2023	9M 2022	9M 2023	9M 2022	9M 2023	9M 2022
Revenue	€ m	152.6	133.5	46.7	43.3	199.3	176.8
EBIT	€ m	4.2	4.5	5.9	5.9	10.1	10.4
EBIT margin	%	2.7	3.4	12.6	13.6	5.1	5.9

Net worth

The balance sheet total as of September 30, 2023 showed a rise of € 12.5 million compared with the 2022 year-end position. Inventories rose by € 1.3 million to € 51.5 million as a result of increased procurement market prices and expanded business activity. The strong business performance in August and September also pushed up trade receivables by € 7.9 million. Thanks to the positive free cash flow, cash and cash equivalents were up € 2.5 million at € 15.0 million. The expanded business activity led to higher trade payables and advances received. Equity at the end of the period amounted to € 92.9 million. The equity ratio remained high at 53.0 % (December 31, 2022: 56.0 %).

Asset and capital structure (in m€), condensed presentation

Assets	30/09/2023	31/12/2022
Fixed assets	68.0	67.6

Trade payables	10.1	7.4
Payments received	7.5	6.8
Other liabilities	8.5	8.9
Total	175.2	162.7

Financial position

The positive development in business in the period under review was reflected in the steady cash flow from operating activities of € 15.4 million. The burden on liquidity from higher procurement market prices and the rise in receivables were much milder than in the reference period. Net cash from operating activities increased by € 6.1 million in the period under review and was substantially up on the prior-year figure of € -3.5 million. The free cash flow came to € 3.0 million. This was an improvement of € 8.3 million compared with the position on September 30, 2022.

No new financing was raised in Q3 2023.

Cash and cash equivalents overall were up € 2.5 million, reaching € 15.0 million. At the reporting date for the period the Group also had available credit facilities totalling € 12.9 million. The liquidity base remained correspondingly comfortable.

Cash flow (in m€)

	01/01– 30/09/2023	01/01– 30/09/2022
Cash flow from operating activities	15.4	15.5
Net cash flow from operating activities	6.1	-3.5
Cash flow from investing activities	-3.1	-1.8
Free cash flow	3.0	-5.3
Cash flow from financing activities	-0.4	-2.9

Report on post-balance sheet date events and risks report

No events with a particular impact on the net assets, financial position and results of operations of the technotrans Group occurred after September 30, 2023.

The relevant opportunities and risks for the future development of the technotrans Group and the risk management system implemented were presented in detail in the 2022 Annual Report and 2023 Interim Financial Report. The opportunity and risk situation of the Group has not changed from the position set out in the Interim Financial Report.

Outlook

Expected framework conditions

The escalation of hostilities in the Middle East prompted a marked deterioration in the geopolitical environment in October 2023. Meanwhile the further course of the conflict between Russia and Ukraine remains uncertain. There is also growing tension between the United States and China. The economic outlook, too, has deteriorated further. In its World Economic Outlook for the global economy in 2024 published in October 2023, the IMF now forecasts 2.9 % growth (previously: 3.0 %). Next year, the euro zone is also set for lower growth of 1.2 % compared with the forecast in the previous outlook dated July (1.5 %). For Germany, the IMF anticipates growth of merely 0.9 % (previously: 1.3 %). Global inflation in 2024 according to IMF estimates will reach 5.8 %. On this basis it is clear that prices of materials and interest rates will remain high. The investment propensity will therefore be muted.

Expected business development of the Group

The assumptions made in the 2022 Annual Report about the future business performance remain fundamentally valid.

There has been a further deterioration in the economic environment compared with Q2 2023. This has been evidenced in particular by the declining level of orders received in the Plastics, Healthcare & Analytics and Laser areas, due to restrained investment activity among other factors. Nor are there any signs of an improvement in the economy in China; the Taicang location will therefore again fail to make a positive profit contribution in the 2023 financial year.

Notwithstanding this environment, technotrans will press ahead consistently with Phase II of the Future Ready 2025 strategy. The findings of the strategy review are also being taken on board.

In consideration of the performance realised in the period under review, for the 2023 financial year the Board of Management stands by its expectation of consolidated revenue at the upper end of the **range of € 255 to € 265 million with an EBIT margin of 5.0 % to 6.0 %**. The return on capital employed (ROCE) is expected to be in the range of 13.0 % to 14.0 %.

The medium-term forecast for the 2025 financial year remains valid, envisaging revenue in the range **of € 265 to € 285 million with an EBIT margin of 9.0 % to 12.0 % and ROCE in excess of 15.0 %**. It is based on the assumption that economic circumstances will continue to develop as for the 2023 financial year.

Performance of technotrans shares (XETRA)

The publication of the adjusted forecast for the 2023 financial year on August 2, 2023 did not result in any price correction of note. In addition, the stock markets are troubled by higher real interest rates and economic worries. At the end of the period under review technotrans shares were trading on Xetra around 37 % lower than at the start of the year, with an average daily Xetra trading volume of around 3,500 units. This compares with growth of 8 % and 12 % respectively for the SDAX and DAXsector Technology.

Analyst ratings as of September 30, 2023

Institution	Recommendation	Price target
Hauck & Aufhäuser	buy	€ 25.00
Kepler Cheuvreux	buy	€ 32.00
LBBW	buy	€ 28.00
Warburg Research	hold	€ 23.00

Investor Relations work

There was plenty of take-up for our extensive offer of talks in the third quarter. The Board of Management and Investor Relations were able to provide comprehensive answers to questions from current and prospective shareholders. We particularly mention the virtual roadshows put on with LBBW and Montega as well as our involvement in the Berenberg and Goldman Sachs Conference in Munich.

Directors' dealings

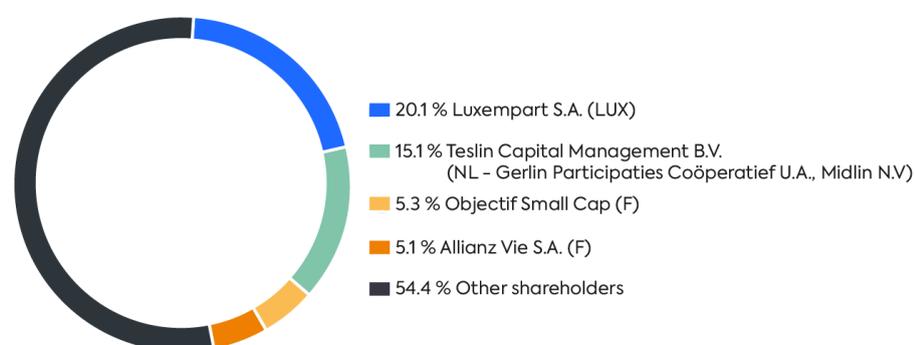

Michael Finger (CEO) acquired 450 shares of technotrans SE in the third quarter. Peter Hirsch (CTO/COO) purchased 700 shares. Both transactions were conducted independently of the Board of Management remuneration agreement.

Ad hoc information

On August 2, 2023 technotrans SE released ad hoc information communicating the adjusted forecast for the year. In this release, the Board of Management indicated that it expected consolidated revenue for the 2023 financial year to reach the upper end of the published range of € 255 to € 265 million. It also adjusted the anticipated range for the EBIT margin from previously 6.2 % to 7.2 % to now 5.0 % to 6.0 %, in a reflection of the challenging economic environment.

Composition of shareholders

The reportable shareholder base remained stable. We did not receive any notifications under Sections 33 and 34 of the German Securities Trading Act (WpHG) in Q3 2023. The shareholder structure as of September 30, 2023 is as follows:

Financial Calendar/Note

Publication	Date
