spray.xact food

Efficient spraying system
for the food industry

Spray lubrication without compressed air for the food industry

The spray.xact food system is based on the proven technotrans spraying technology which is originally used in punching and forming applications. It has been extensively and specifically adapted to the requirements of food producers.

Advantages at a glance:

- Low to no mist media application
- Prevents unwanted deposits
- Lower cleaning requirement
- Sustainable, energy efficient and resource saving
- Lower investment and maintenance requirements
- Process reliability and control
- Easy to integrate into overall systems
- Parameters can be set according to requirements
