

Corona crisis

INFORMATION OF THE BOARD OF MANAGEMENT OF THE TECHNOTRANS GROUP ON COVID-19

DEAR BUSINESS PARTNERS,

The „Coronavirus“ (SARS-CoV-2) affects us all and considerably restricts us in our daily activities, both with regard to private and business matters. The health and welfare of our employees, customers and suppliers has to be our main priority. We are therefore monitoring the current situation very carefully and pro-actively adapting our measures and activities to any statutory regulations or guidelines and the recommendations of the Robert Koch Institute (RKI) and adapt our activities immediately.

technotrans has adopted a wide range of precautionary measures to minimise the impact on business operations and protect all employees and business partners from COVID 19 infection. These include extensive hygiene measures, greater use of home offices, the conditional introduction of two-shift operation and extensive restrictions on travel. Despite a reduced presence, this has so far enabled us to ensure the operational capability of all locations.

Notwithstanding these exceptional circumstances we strive to fulfil your requirements to your full satisfaction. We make every effort to continue to process orders quickly and accurately and to organise the supply chain efficiently. Should the situation change, we will inform you promptly.

In the meantime, normality is returning to our Chinese production after the great wave of infection. This shows us that the measures ordered by the German government to reduce social contacts are effective and that, with disciplined behavior, we can put this crisis behind us as quickly as possible.

It will take a combined effort to contain the coronavirus and decelerate its spread, so that we can return to normality as quickly as possible and be able to to welcoming you personally again soon..

Until then, stay healthy!

The Board of Management

Dirk Engel
